

Report on Environmental conservation awareness by Adopted Village Cell, B.H. College.

The environment is the basis of the entire living beings. Environmental conservation awareness is a moral responsibility of individuals or institutions. The Adopted Village Cell of BH College is aware of this responsibility and has been creating awareness among the people of Adopted Village for environmental conservation. Such activities are tree plantation, agricultural workshop etc.

Tree Plantation Programme on 25-04-2016

An programme on tree plantation was arranged in Barbarijhar and Simlajhar villages on 25th April, 2016 at 1.30 PM keeping in view of the global warming which is created by environmental imbalance. The programme was inaugurated by Omar Ali, an oldest person of the locality. All total of 50 valuable saplings of different varieties were planted at different places of the locality. It is worth mentioning that the seedlings planted in 2016 have become huge trees today.

Awareness Programme on Cultivation on 25-04-2016

Nowadays it is very common to apply chemical fertilizers to the soil for higher yields. This has resulted in deterioration of soil quality and threat to human health. In this context, Agricultural Workshops have been conducted to help farmers find the right path.

An Awareness programme on cultivation was held at community hall of Barbarijhar village on 25th April, 2016 at 11.00 AM organised by Adopted Village Cell in collaboration with Krishi Vigyan Kendra, Howly (under AAU). In the programme Mr. Gunadhya Upamanyu, Agriculture Scientist, KVK, Howly participated as resource person.
